## Three editors

1. DMP editor: basic metadata for DMP (scope, actors, funding, etc); full DMP & Datasets record
2. Dataset editor: embedded in DMPs; documentation of more than one datasets per DMP (diversity in data types and/or disciplinary data)
3. Template editor: defines personalised structures for Datasets

## Outcomes

- Import/export mechanism
- Template editor new function
- Argos new entities
- DMP entity and relationships
- Discovery of DMPs
