Novel EOSC Services for Emerging Atmosphere, Underwater & Space Challenges

NEANIAS receives funding from
European Union's Horizon 2020
research and innovation programme
under grant agreement No. 863448

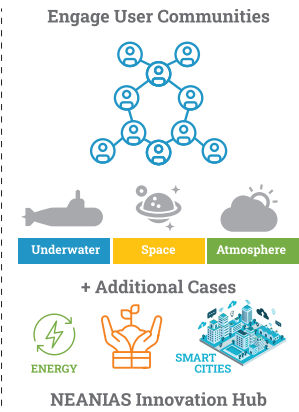

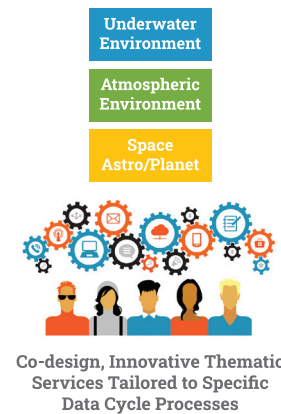

NEANIAS will promote Open Science practices and play active role in the materialization of the EOSC ecosystem by efficiently engaging large scientific and professional communities; actively contributing to the technological, procedural, strategic and business development of EOSC.

NEANIAS will drive the co-design and delivery of innovative thematic services, derived from state-of-the-art research assets and practices in three major sectors: Underwater research, Atmospheric research and Space research, each engaging multitudinous academic and business groups, numerous researchers, professionals and governmental entities.

Services - Infrastructures Communities & Businesses

Sustainable Innovative Services to the Research Communities

Address community specific needs for underwater, atmosphere and space research sectors

Onboard communities to the Open Science, EOSC and interdisciplinary research era

Nurture new business opportunities

Power-up EOSC

Business & Sustainability Outlook

Strong orientation to industry & business
• 5 SME partners • 2 Enterprise partners

Focus on business planning:
market analysis, cost analysis, legal and ethical issue analysis etc

Two business innovation cases from SMEs
• Energy • Smart Cities

Strong external innovation motivation
• Open Innovation Calls • Linking to innovation hubs
• Provisions for datathons and hackathons with prizes and incubations
